

9/19/2022

Hi Jim,

I would like you to know that I am in full support of the Geotextile runway installation and think it would be an important improvement for our club. I am also pledging a minimum of \$500 for the project and will help with fundraisers.

The members that have larger planes and want to fly off of grass will still have the option and those that need a smoother surface will have what they need. It will definitely be an asset for our club and I would expect that it would attract new members and keep the current members that are looking for a better runway surface.

It is unfortunate that a few vocal members can control the future of our club when it appears to me that the majority are in favor of this project.

Thanks,

Gary Grosso
